@RAMESHLASIKANDLASER

Dr. G. Ramesh is an eminent refractive surgeon in India and one of the top refractive surgeon in the world, He has performed successfully more than 1 Lakh refractive surgeries. He has been recognized internationally and awarded multiple times, since 2013 by STAAR Surgical USA for successfully performing maximum number of ICL Surgeries in India. He has 25 years of experience in the field of refractive surgeries.

He worked in Bollineni Hospital, Kims, Global Lasik and Laser Center as chief refractive surgeon till 2016.

He has started Ramesh Lasik and Laser Centre in the year 2017 with the vision and mission to give best possible vision correction without glasses / contact lens, Using world class technology and is constantly upgrading to the latest technology at one place.

Dr. G. Ramesh helped several people in India to achieve their career goals by correcting vision for navy, army, air force, railways, police dept, job opportunities.

Improved opportunities for many people correcting their vision for both indoor and Outdoor sports both for men and women. He has improved quality of life of many individual and software professionals who are tired of wearing glasses and contact lens leading to compromised life style.

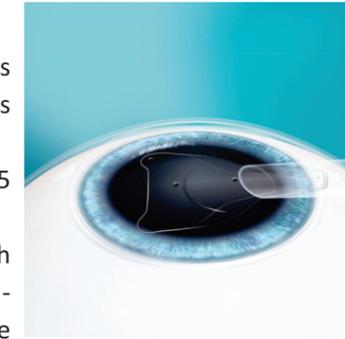

PRK / Trans PRK (Surface ablation)	Femto Lasik / Robotic Femto Lasik (Flap Procedure)	Smile / Smile Pro (Flapless procedure) Robotic procedure
More suitable for patient with thin Cornea or corneal scars.	Quick visual recovery.	Quick Visual Recovery.
Requires removal of epithelium with alcohol - / laser.	Wide range of treatment option like CONTOURA / SMART PULSE TECHNOLOGY / ROBOTIC LASER.	No Flap Required.
Post op healing can be uncomfortable with pain watering for 3 to 5 days.	May require multiple laser usage in one sitting.	Required only one laser.
May require more time off from work & activity.	Quick return to normal activity. No postoperative pain.	Quick return to normal activity in 24 hours No postoperative pain.

ICL:

- A biocompatible collamer lens is permanently place between iris and natural lens.
- Candidate who is between 18 to 45 yrs old
- Candidate who are near sight with mild to severe myopia -0.75 to -6.00, hyperopia 2 to 10 Who are not eligible for Lasik / Femto / Smile Procedures.
- Have not changed in glass prescription of more the -0.75 in 6 months
- ICL procedure has no pain, can get back to normal activity in 3 to 4 days
- Cornea remains untouched
- Made of 100% biocompatible collamer material
- Reversible procedure
- High definition vision quality.

Dr.Ramesh has been recognized internationally and felicitated by "STAAR SURGICALS" U S A for successfully performing maximum number of I C L procedures multiple times since 2013.
